YOUR TURNKEY SPORTS LIGHTING SOLUTION

Gameday Solution

The Gameday Solution Team

"Building to a Higher Standard"

Symmetry was founded in 2010 with one primary goal in mind, glorifying God by setting the standard in sports construction. Since then, we have been trusted to build hundreds of high-profile projects, including 7 NFL fields and dozens of NCAA fields, and have evolved into a much larger construction company with the ability to facilitate a turnkey approach to sports construction.

"Just Call Add-All"

Add-All Electric was founded in 1970 by master electrician and Irving, TX native, John Smith and his wife Becky. They built the business on a strong work ethic and commitment to customer satisfaction. In 1994, Eric Smith (John & Becky's son) started in the business and by 2004, Eric earned his Master Electrician license.

Today, the company has grown and diversified into residential, commercial, industrial, and motor control and machine electrical services. Although many things have changed since 1970, one thing that hasn't changed is Add-All Electric's commitment to customer satisfaction.

"Your Experience Matter"

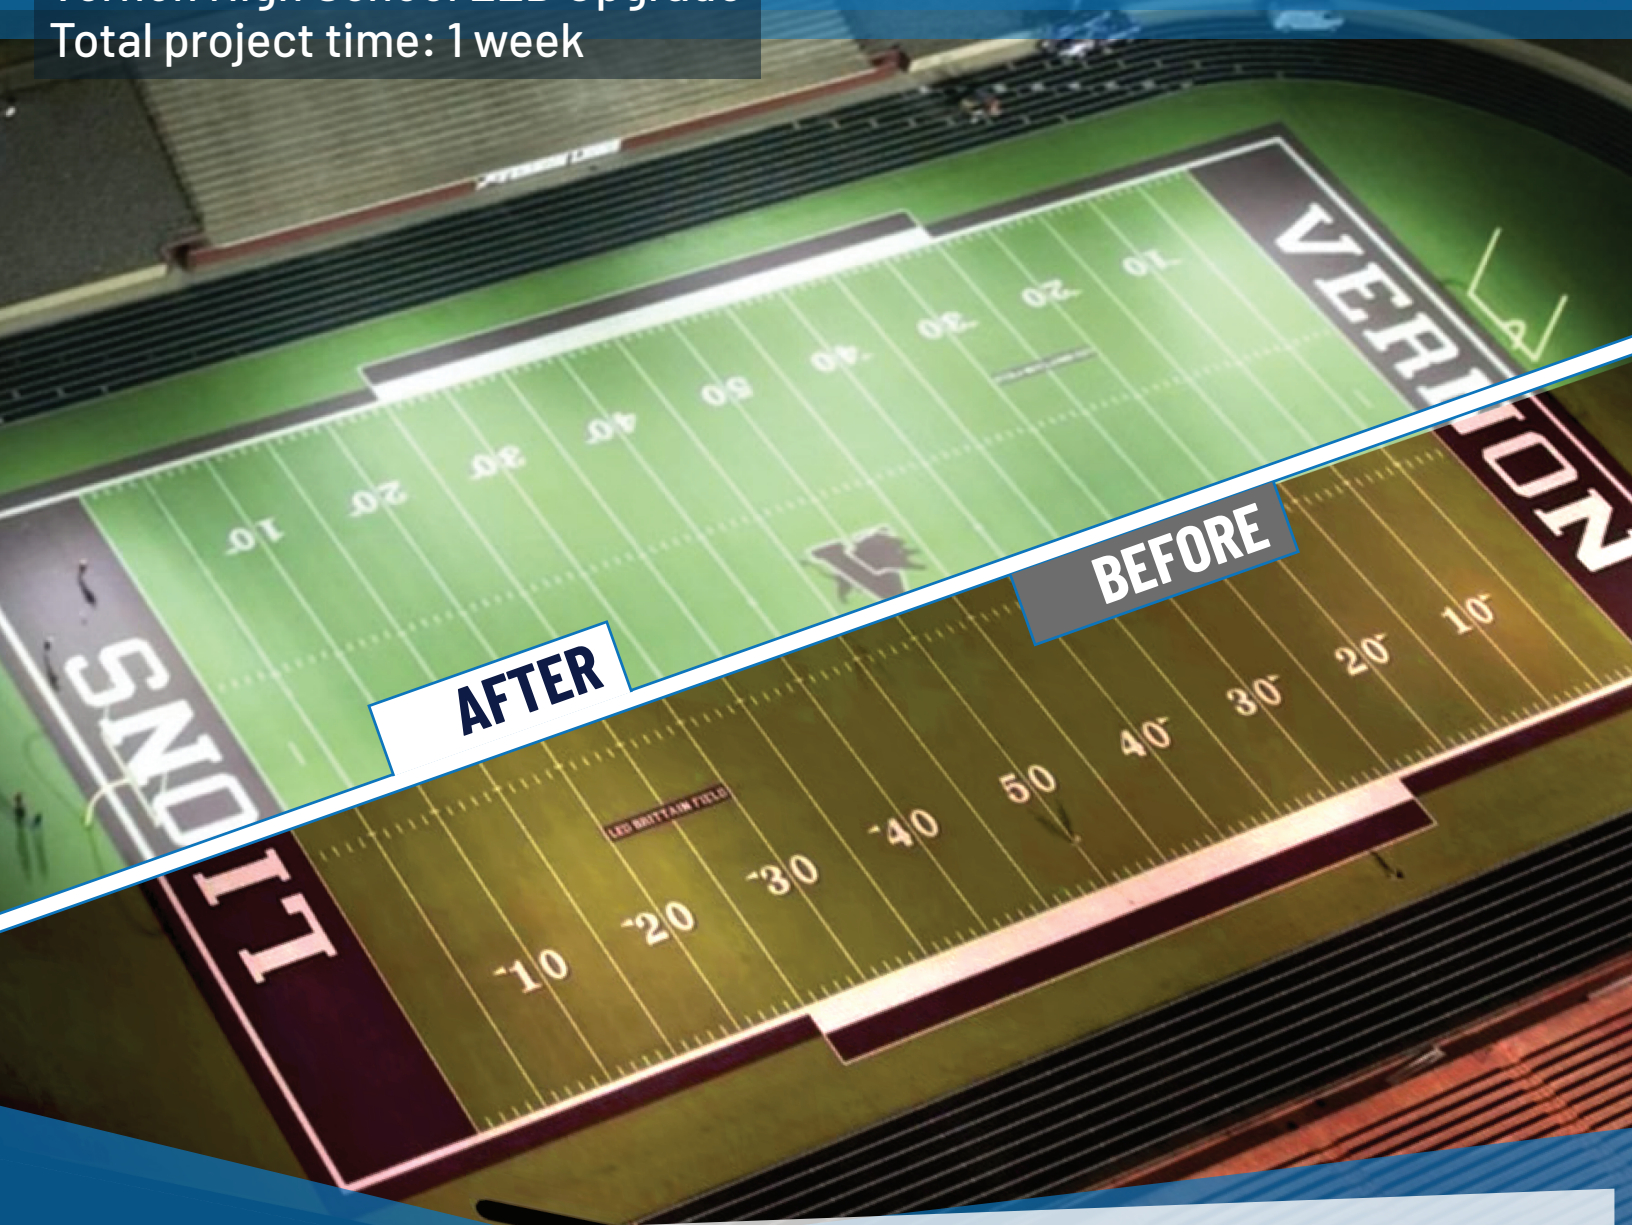

SLG Lighting is a vertically integrated manufacturer producing solutions for the largest companies in the world for over 20 years.

In addition, we noticed opportunities in the sports lighting market as it transitioned to LED where we could provide better turnkey solutions to our customers. Customer experience matters. Your experience matters. Our experience matters. When you work with SLG Lighting you will experience a difference right away. Our commitment to building relationships means responsive customer service, trusted products, and unmatched availability - all backed by the longest warranties in the industry.

"In 29 years of education, I have never had a project go as smoothly as this project."

Jeff Byrd, Superintendent at Vernon High School
Vernon, TX

Vernon High School LED Upgrade
Total project time: 1 week

AFTER

BEFORE

"Vernon ISD had several major projects at our football stadium that we needed to address in a timely manner. The major issue was our lighting system that needed to be addressed before the start of the season. The new lighting system was completed within five working days! We were updated daily! In 29 years of education, I have never had a project go as smoothly as this project. I cannot say enough good things about the Gameday Solution Team. I will never use another company for our projects. Do yourself a favor and give them an opportunity to earn your business, I can guarantee that you will not be disappointed."

- Jeff Byrd, Superintendent at Vernon High School -
